

## EngAgency Front End Evaluation

This evaluation is meant to give us an idea of your current skill level and potential when it comes to front end design and implementation. We encourage you to take design liberties when completing your assignment. You are free to use external CSS & Javascript libraries and make any additional modifications to improve usability, maintainability and attractiveness.

---

1. Please recreate the design you see in the mockups provided. Some elements have been provided, feel free to edit the markup as you feel necessary.
  - a. Use semantic HTML.
  - b. Make it responsive. Feel free to use flexbox, bootstrap, or other responsive frameworks in your solution.
2. Use the breakpoints from the Mockup file names and use a max-width container of 1200px.
3. Configure the “Our Projects” link in the “Call to Action” Banner to open in a new window/tab.
4. In the icon features, please order each item so that the following is true:
  - a. On desktop sizes, the order of the columns should be as such:

Smart Architecture	Stress Free Maintenance	In Depth Audits
--------------------	-------------------------	-----------------

- b. On Tablet sizes, the order of the columns should be as such:

Stress Free Maintenance	
Smart Architecture	In Depth Audits

- c. On Mobile sizes, the order of the columns should be as such:

In Depth Audits
Smart Architecture
Stress Free Maintenance

5. Use the following style guide and incorporate it into your finished project:
  - a. Main brand colors are: #E24301, #333333, and #FFFFFF.
  - b. Main Navigation Links should have a hover white underline of 3px.
  - c. Icon Features Header Text should have a hover color of #E24301.
  - d. Add a subtle box shadow below the Call to Action Banner.

6. Clean up any other issues you may find.
